

Honors Math 3 – Midterm Review Rubric

The goal of this project is to demonstrate your ability to work Honors Math 3 problems and present them to the class. The Midterm Review Project is a unique strategy to assist students in learning how to interpret math. This method will also give students a chance to think and internalize previous knowledge and newly acquired concepts.

1. The class will be divided into 7 groups that will create a “Clean and Legal” Honors Math 3 Tutorial using **one** vertical box of concepts from the following chart
2. Each group will learn a “NEW” digital delivery method. i.e. emaze, prezzi, voice thread, voki, goanimate, powtoon, pictochart, see the following websites for ideas:
